Do it right, the overlay way using a Kleerway™ Grid. These are clear, heavy duty see-thru, metric grids with red graphics manufactured by Oregon Rule Co. selected from our Tru-Grit™ Grid product line. Each grid has a pair of strategically placed 1mm graduated scales and 1cm square grid windows that maximize overlay visibility. Sizes correspond to standard X-Ray films and include the addition of our popular wallet and pocket sizes for measuring small inclusions.

There are 2 basic patterns; (A) Cross-Hair, and (B) Incremental Edge Graduated, each with their own functional use. Grid overlay protractors and rulers are also available. Check out our related products: see our Fandangle Angle™ Protractor, Grid-Loc™ Ruler, and Ovaltyn™ Circle Guide, or The Carson Kit™ which makes a great starter set. Specials can be made to your specifications. Contact our Sales department.
