

Blood Stain Evidence Reports

These reports are a quick and practical way to record pertinent evidence at a crime scene for later use. The criteria boxes provide a selection of information to be obtained while the 10 cm square and the 15 cm rule provide accurate X-Y axis frame-of-references.

Reports are made of a tear resistant matte surfaced paper that has a removable adhesive and come 2 per sheet on a removable liner. They come pre-packaged with 5 sheets (10 total reports) in a clear 7x9" poly bag.

Part Number: BSER-10x10-5 @ \$9.95 each
